Deadline 1: Project Analysis

Group 1-21

Efe Okan & Victor Trappeniers

Project Description

Title: Scouts Agenda Manager

Description:

The Scouts Agenda Manager allows parents to check upcoming scout activities. Leaders can create, edit, and delete events. Head leaders have additional privileges to manage leadership roles and post news. Only leaders and head leaders can log into the platform.
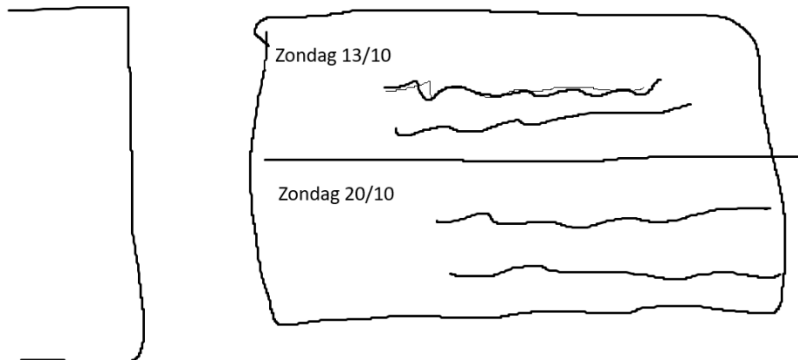

User Stories

Story: Agenda overview

As a user

I am able to look at the agenda overview

So I know what activities are planned.

Wireframe:

Acceptance criteria

- Each Agenda point of a selected group is shown
- When a group has no agenda points, "No current agenda points" is shown
- The date and time of each agenda point is properly shown
- Agenda points are shown based on date, earliest first

Story: Change agenda points

As an admin (leider)

I am able to add, change and delete agenda points

So that all users know when to be where

Wireframe:

Acceptance criteria

- An agenda point can be added
- An agenda point can be removed
- An agenda point can be changed
- Agenda points are shown based on date, earliest first
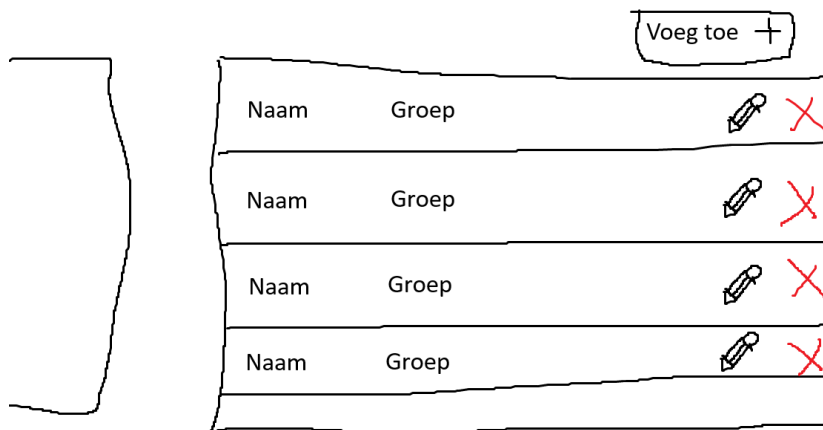

Story: Change Admins (leiders)

As a headadmin (hoofdleider)

I can add, change and remove admins (leider)

So that all users can see the people responsible for their group and the admins can only change the agenda of their respective groups

Wireframe:

Acceptance criteria

- An admin can be removed

- An admin can be added

- An admin can be changed

- Admins are displayed on each groups agenda

Story: add news messages

As a headadmin (hoofdleider)

I can add change or delete news messages

So I can keep all my users up to date on certain general events
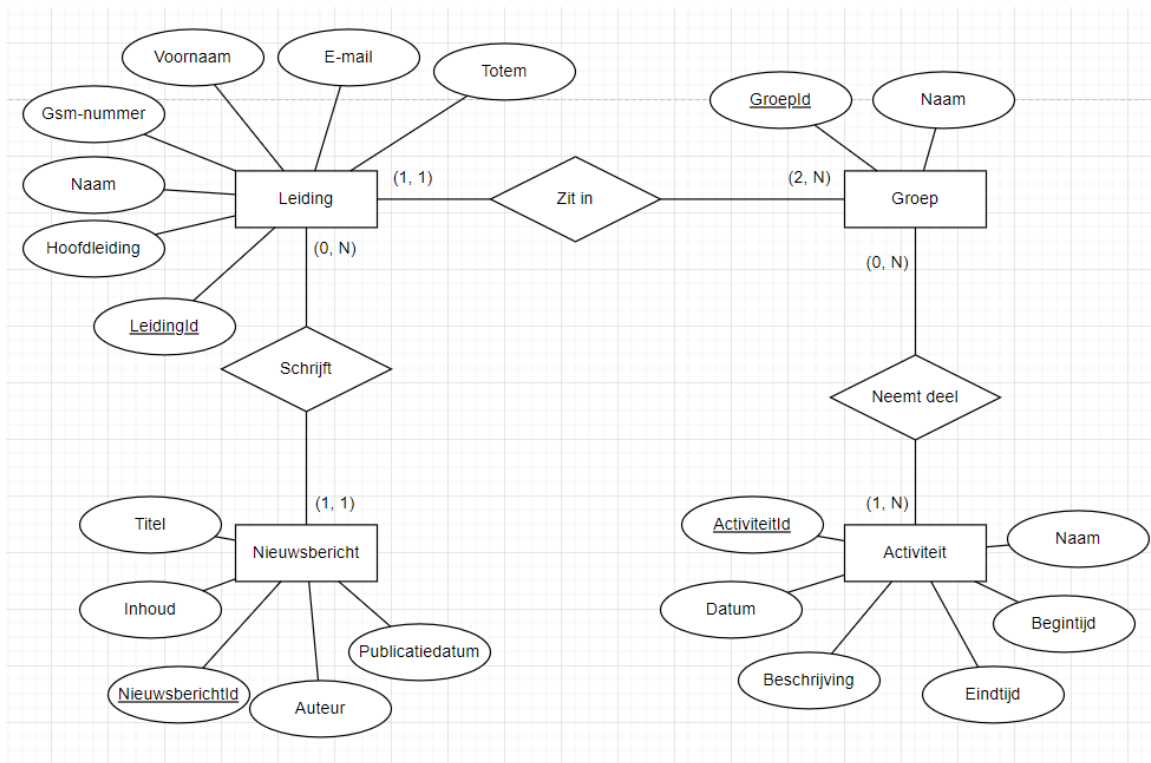

Wireframe

Acceptance criteria

- A news item can be removed
- A news item can be added
- A news item can be changed
- News items are displayed on properly, most recently made first
